Re: Reply to final office action from 12th October, 2010

To whom it may concern,

I hereby request reconsideration of my patent application referenced above in light of the examiner's rejection being based on an incorrect interpretation of the application, especially with regards to how the current application correlates to a human being.

Unfortunately this fact first came to light in the final response to my previous amendment in the response to arguments and in a subsequent telephone conversation on 13th December, 2010 with the examiner and his supervisor.

Please find attached:
